GOALS & BENEFITS OF Livescan

Many agencies have a livescan device used to fingerprint individuals. In and of itself, a livescan device can provide several benefits including:

- ◆ Eliminates messy fingerprinting with ink
- ◆ Eliminates duplicate keying
- ◆ Real-time verification of fingerprint quality
- ◆ Correct bad prints easier
- ◆ Eliminates dual fingerprinting for FBI
- ◆ Fingerprint once – generate multiple cards/copies
- ◆ Reduces physical contact with inmate
- ◆ Prompt screening for prior criminal record
- ◆ Immediate update of criminal record
- ◆ Provides the infrastructure for submitting mugshots, scars, marks and tattoos to the Michigan State Police Statewide Network of Agency Photos (SNAP)

These are only a small portion of the potential benefits that are available through **electronic submission** of livescan records.

Other Benefits

- ◆ Reduce liability resulting from releasing a wanted person who gave a false name.
- ◆ Avoid potential lawsuits by positive ID before incarcerating.
- ◆ Identify suspects in other crimes when fingerprints are checked against unsolved latent fingerprint database.

WANTS AND WARRANTS

If after receiving fingerprint response name and/or DOB differs you must run a QHW on the name(s) and DOB(s) received. This will give you all in state and out-state want/warrant information on the subject you have in custody.

Ways to improving fingerprint quality

Clean and apply water to fingers
Roll fingers nail to nail

MESSAGES

- Once the record is transmitted an initial check of the following fields occurs:
 - TCN (Transaction Control Number)
 - Name (valid format)
 - Race (is valid)
 - Sex (is valid)
 - Date of Birth (is valid and greater than 7 yr.)
 - Fingerprints (in correct sequence)
- If these fields are **ACCURATE** the record is **ACCEPTED** for processing.
- If one of these items is not correct the record is **REJECTED** and an **ERROR MESSAGE** is sent back to the live scan noting the problem.

If the record is **REJECTED** the **OPERATOR** should correct the problem and **RE-TRANSMIT**.
- A record will also reject a **DUPLICATE TCN** (ex: the record was transmitted twice) even if the retention code was changed from one transmission to another. If a fingerprint record is sent for **QUICK ID** and it is later determined that arrest charges are reportable, a new record and fingerprints must be transmitted with a retention code of "Y". This will create a new TCN.

NOTE: This message is NOT A RESPONSE – it only notifies operator if record was accepted or rejected.
